

GIFT 07

GUIDELESS

CLAIM-TO-SOURCE REGISTER

SCOPE

Public evidence reviewed through 29 August 2026. This appendix supports two findings: public comparison drift around Tango, and a wider public category boundary across maintenance, contextual delivery and execution.

LEGEND

FACT

INFERENCE

NOT ESTABLISHED

Vendor pages may prove what that vendor publicly claims or offers. They do not independently prove competitive membership. Membership confidence is handled separately on page 4.

QUALITY BOUNDARY

- No internal roadmap, win-loss data or private customer research was reviewed.
- No absence claim is made where public evidence was not found.
- Product capability claims remain bounded to the cited public pages.
- No third-party cost model is used in this brief.

FINDING 01

The Tango comparison contains buyer-visible factual drift.

F1.1

FACT

Guideless's 12 January 2026 comparison describes Tango as screenshot-and-text documentation with no audio.

The statement appears in the feature table and surrounding copy on the Guideless page.

SOURCES: G3

F1.2

FACT

Tango's current public pages show auto-generated video walkthroughs, 40+ language AI voiceover, Nuggets, Agents, automation and MCP integrations.

Capabilities are described across Tango's live comparison, product and dated 20 August announcement.

SOURCES: T1, T2, T3

F1.3

INFERENCE

The live Guideless comparison no longer describes Tango's current public product surface.

This follows from the conflict between the dated Guideless representation and current Tango evidence.

SOURCES: G3, T1, T2, T3

F1.4

INFERENCE

A buyer who verifies the mismatch has a reason to question the rest of the comparison.

The credibility risk follows from placing an outdated, buyer-checkable claim inside public competitive content; it does not establish actual buyer behavior or revenue impact.

SOURCES: G3, T1, T2, T3

FINDING 02

The public category boundary extends beyond guide creation.

F2.1

FACT

Guidde Broadcast has delivered application- and page-location-based content since at least 22 September 2025.

The help article specifies exact URL, playlist and partial URL matching. This is an established capability, not a new trigger-period launch.

SOURCES: D2

F2.2

FACT

Guidde can use assigned channels to segment content by team, geographic location and interests.

The 16 July 2026 content-management article gives separate Sales and Marketing channel examples.

SOURCES: D3

F2.3

FACT

Clueso publicly describes autonomous browser recording and GitHub-linked detection and regeneration of outdated videos.

The page says the browser agent navigates and records autonomously; GitHub enables update detection and regeneration.

SOURCES: C1

F2.4

FACT

Tango publicly exposes in-app guidance, browser-based workflow automation, Agents and MCP integrations.

The capability boundary is visible across current primary pages and the dated August announcement.

SOURCES: T1, T2, T3

MEMBERSHIP AND CONFIDENCE

Known competitors are separated from scan-derived candidates.

KNOWN / HIGH

TANGO

Guideless maintains a direct Tango comparison page. YesPress also places Tango in the same workflow-documentation market context.

SOURCES: G3, I2

KNOWN / HIGH

GUIDDE

Guideless maintains a direct Guidde comparison page. YesPress independently places Guidde in the AI tutorial category around Guideless.

SOURCES: G4, I2

SCAN-DERIVED / MEDIUM

CLUESO

YesPress independently places Clueso in the same AI tutorial category. Tracxn provides weaker database corroboration. Primary Clueso pages prove features, not membership.

SOURCES: I2, I3; C1 for capability only

BOUNDARY

Product Hunt's algorithmic category and stale directory fields were not used as primary membership proof.

GUIDELESS AND INDEPENDENT SOURCES

Direct URLs are clickable.

G1

Guideless product page

GUIDELESS / PRIMARY / REVIEWED 29 AUG 2026

Current product surface: capture, generate, edit, publish, analytics and integrations.

<https://guideless.ai/>

G2

Guideless pricing

GUIDELESS / PRIMARY / REVIEWED 29 AUG 2026

\$29 per user/month billed annually; unlimited guides, narration, voiceover and MP4 exports on Pro.

<https://guideless.ai/pricing/>

G3

Guideless vs Tango

GUIDELESS / PRIMARY FOR GUIDELESS'S PUBLIC CLAIM

Dated 12 Jan 2026; frames Tango as screenshots/text and no audio.

<https://guideless.ai/compare/tango-alternative/>

G4

Guideless vs Guidde

GUIDELESS / PRIMARY FOR KNOWN-COMPETITOR STATUS

Dated 8 Jan 2026; establishes Guidde as a known comparison target.

<https://guideless.ai/compare/guide-alternative/>

I1

Guideless funding report

TECH.EU / INDEPENDENT / DATED 20 AUG 2026

EUR 1M pre-seed, founders, late-2025 soft launch, June 2026 incorporation and planned expansion.

<https://tech.eu/2026/08/20/lithuanian-ai-startup-guideless-raises-eur1m-to-streamline-software-training/>

I2

Guideless company profile

YESPRESS / INDEPENDENT EDITORIAL / DATED 20 AUG 2026

Names Guidde, Clueso and Guidejar in the AI tutorial category; reports a 2-10 LinkedIn team range.

<https://yespress.io/guideless-ai>

I3

Guideless company database

TRACXN / INDEPENDENT DATABASE / SUPPORTING ONLY

Lists Clueso among Guideless competitors; used only as weak corroboration.

TANGO SOURCES

Current product surfaces plus one dated announcement.

T1

Tango vs Guidde

TANGO / PRIMARY / REVIEWED 29 AUG 2026

Current page shows auto-generated video walkthroughs, 40+ language AI voiceover, Nuggets and Agents.

<https://www.tango.ai/compare/tango-vs-guidde>

T2

Tango Inc. 5000 announcement

TANGO / PRIMARY / DATED

Dated 20 Aug 2026; names Nuggets, AI agents and MCP integrations for humans and AI systems.

<https://www.tango.ai/blog/tango-inc-5000-2026>

T3

Tango browser-agent integrations

TANGO / PRIMARY / REVIEWED 29 AUG 2026

Browser agents click, type and fill forms across SaaS applications; includes cross-app automation examples.

<https://www.tango.ai/integrations>

T4

Tango pricing

TANGO / PRIMARY / REVIEWED 29 AUG 2026

Current plan boundaries; Enterprise includes Pins, Guide Me and Automations.

<https://www.tango.ai/pricing>

DATE LOGIC

G3 provides the 12 January baseline. T2 provides a dated 20 August product statement. T1 and T3 were reviewed live on 29 August and establish the current public surface.

GUIDDE AND CLUESO SOURCES

Guidde timing and Clueso confidence remain explicitly bounded.

D1

Guidde product page

GUIDDE / PRIMARY / REVIEWED 29 AUG 2026

Current creation and broadcast positioning.

<https://www.guidde.com/>

D2

Guidde Broadcast

GUIDDE / PRIMARY / DATED

Dated 22 Sep 2025; contextual delivery by application and page location, with URL-match priority.

<https://help.guidde.com/en/articles/10434881-guidde-broadcast>

D3

Broadcast content management

GUIDDE / PRIMARY / DATED / SUPPORTING

Dated 16 Jul 2026; assigned channels can segment content by team, location and interests.

<https://help.guidde.com/en/articles/11106158-content-management-for-guidde-broadcast>

C1

Clueso Agents

CLUESO / PRIMARY / REVIEWED 29 AUG 2026

Browser agent records autonomously; GitHub connection detects changes and can regenerate outdated videos.

<https://www.clueso.io/agents>

C2

Clueso pricing

CLUESO / PRIMARY / REVIEWED 29 AUG 2026

Current public plans and export limits; Agent availability by plan is not established on this page.

<https://www.clueso.io/pricing>

WHAT REMAINS UNKNOWN

These unknowns limit the recommendation by design.

U1

Guideless's internal roadmap, prototypes and private beta capabilities.

U2

Which adjacent job has the strongest demand among current paying customers.

U3

Competitive win-loss frequency and the revenue impact of current comparison pages.

U4

The commercial availability and plan boundary of every agent capability described by competitors.

U5

Whether public comparison pages are current acquisition drivers or low-traffic archive content.

ALLOWED

Use the evidence to correct dated public claims and define a bounded customer test.

NOT ALLOWED

Claim that Guideless lacks unpublished capabilities, that its founder is unaware, or that competitor features prove buyer demand.

No third-party cost model appears in this Gift; the guardrail above governs interpretation rather than cost arithmetic.
