

Transcend vs OneTrust

Evidence Appendix

Source-level audit trail for the two Priority B accounts, the Watch/Reject exclusions, and the evidence boundaries behind the Executive Brief.

PUBLIC EVIDENCE ONLY

No internal pipeline, CRM, customer, product-access, or private company data used.

Research checked: 3 Sep 2026

Package: Executive Displacement Brief + Evidence Appendix

APPENDIX PURPOSE

Designed for auditability. A skeptical executive should be able to inspect how each finding was built, what evidence supports it, what contradicts it, and what remains unknown.

Method and source standard

The appendix separates factual extraction from interpretation. AI-assisted synthesis is not treated as source evidence.

RULE	HOW IT WAS APPLIED
Account proof	Finalist incumbent claims require account-specific evidence or directly linked operational evidence. Competitor customer pages and technical traces were discovery inputs only.
Detection vs proof	Optanon or other technical traces were not treated as customer proof when direct account-authored attribution was absent. Ocado is an example where direct attribution upgraded an earlier IE-3 trace to IE-4A.
Trigger recency	Recency is made visible. Reposted or evergreen roles are not silently presented as newly created events. Regeneron R47119 is treated as current/reposted activity, not as a new 2026 role.
Capability evidence	Transcend product claims are AV-2 prospect-documented capability unless independently/directly tested. Account-match is a separate question.
Contradiction attack	Every deep-researched account was searched against the thesis. Product parity, multi-vendor architecture, stale chronology and scope mismatch can downgrade or reject an account.
No intent inference	Priority is a research conclusion, not a prediction that an account is dissatisfied, evaluating alternatives, planning migration, or ready to buy.
Human review	Blind reviewer findings are recorded when they changed source handling, recency, title accuracy or evidence weighting. Reviewer agreement never substitutes for inspectable underlying sources.
CLASSIFICATION READ	Priority B can survive with IE-3+ and T2+ only when fit, advantage relationship, chronology and contradiction review remain defensible. Thresholds are not quotas. Ocado remained Watch because the trigger/advantage relationship did not survive at the same quality as the two finalists.

Executive Brief claim ledger

A crosswalk from the decision-oriented brief to the evidence logic in this appendix.

ID	TYPE	CLAIM / READ	BRIEF	SOURCE BASIS	GUARDRAIL
B-01	FACT	Transcend publicly maintains a dedicated OneTrust switching/migration motion.	Brief p2	S-P01, S-P02 Prospect primary	No claim that any target account has started a switch.
B-02	FACT	Actual funnel: 16 candidates -> 4 deep-researched -> 2 Final Priority B -> 0 Priority A.	Brief p2	Research OS candidate register / final dossiers Internal audited register	Actual counts only; not a quota.
B-03	INTERPRETATION	Regeneron merits targeted verification as Priority B.	Brief p4	R-01 to R-09 CD-21 final dossier	Modernization question; no switch intent.
B-04	INTERPRETATION	Lucid merits targeted verification as Priority B.	Brief p5	L-01 to L-07 CD-21 final dossier	Consolidation question; no pain/switch claim.
B-05	INTERPRETATION	Ocado is Watch, not a current finalist.	Brief pp6-7	O-01 to O-04 CD-19 + blind review	Strong incumbent proof but weak current opening.
B-06	INTERPRETATION	DHL is Reject for this Gift.	Brief pp6-7	D-01 to D-04 CD-19	Incumbent proof survived; displacement thesis did not.
B-07	SYNTHESIS	The shared finalist pattern is modernization inside incumbent footprints, not visible switching intent.	Brief p6	Regeneron + Lucid final dossiers Cross-account synthesis	Pattern depends on both accounts and preserves contrary evidence.

Regeneron - account evidence

Final Priority B. Strong direct OneTrust proof and current privacy/data/AI governance activity; no migration signal.

ID	TYPE	FACTUAL EXTRACTION / INTERPRETATION	SOURCE(S)	SOURCE DATE	CLASS	LIMITATION / CONTRARY
R-01	FACT	Regeneron links privacy-rights requests from its corporate Privacy Notice to a OneTrust-hosted Privacy Portal.	S-R04, S-R05	20 Nov 2025 / live	IE-4A	Direct current incumbent evidence for rights-request intake.
R-02	FACT	Regeneron.com cookie consent uses OneTrust/Optanon on the current corporate property.	S-R06	Mar 2026	IE-4A	Direct account-authored vendor attribution.
R-03	FACT	Current privacy-operations work includes PIA, ROPA and DSAR improvement and AI/technology-enabled automation.	S-R07, S-R12-S-R14	Aug 2026 repost evidence	T3 support	R47119 is current/reposted; do not claim the role was newly created in 2026.
R-04	FACT	Current privacy counsel supports Digital/IT, Information Security, AI and Data Governance and assesses privacy risk around innovative initiatives.	S-R11, S-R15	Current / 21 Aug 2026 mirror	T3 support	Canonical title comes from S-R11; mirror titles can differ.
R-05	FACT	A new Digital Technology Committee was established in Apr 2026 with AI, data-governance and privacy-law oversight.	S-R16	Apr 2026	T3 support	Primary structural-change evidence.
R-06	FACT	A current Data Protection & AI Security role advises the Enterprise Data & AI governance council and owns DSPM strategy over a 112+ PB data estate.	S-R17	Current	T3 corroboration	Adjacent data-protection/security evidence; not a OneTrust replacement signal.
R-07	FACT	Transcend documents DSR automation, live data inventory/ROPA, automated assessments and OneTrust-formatted assessment import.	S-T08-S-T10	Current	AV-2	Prospect-documented capability; no independent superiority benchmark.
R-08	FACT	OneTrust currently documents DSR automation, privacy operations/RoPA/data mapping and AI governance.	S-C08-S-C10	Current	Contrary evidence	Material product-parity counter-case.
R-09	INTERPRETATION	Regeneron is worth investigating for privacy-operations platform modernization, not because public evidence shows replacement intent.	R-01 to R-08	Checked 3 Sep 2026	Priority B	No dissatisfaction, active evaluation, procurement change or migration intent established.

FINAL READ

Investigate whether privacy-operations modernization is being executed entirely inside OneTrust or whether an alternative operating model is genuinely in scope. Do not state or imply that Regeneron is unhappy with OneTrust.

Regeneron - scope, chronology and contradiction

The account survives because the current trigger is materially relevant, while the incumbent-parity counter-case stays visible.

DATE	OBSERVED EVENT	SOURCE	READ
20 Nov 2025	Corporate Privacy Notice links rights requests to OneTrust Privacy Portal.	S-R04/S-R05	Current incumbent - rights intake
Mar 2026	Corporate Cookie Policy explicitly names OneTrust/Optanon.	S-R06	Current incumbent - CMP
Apr 2026	Digital Technology Committee established with AI/data-governance/privacy-law oversight.	S-R16	Structural trigger
16-28 Aug 2026	R47119 privacy-operations role actively reposted; PIA/ROPA/DSAR + AI automation.	S-R07/S-R12-S-R14	Current workload; role novelty not claimed
21 Aug 2026 / current	R46433 Digital/Cyber/AI privacy counsel active.	S-R11/S-R15	Trigger corroboration
Current	R47426 Data Protection & AI Security; Enterprise Data & AI governance council; 112+ PB.	S-R17	Structural corroboration, not replacement signal

ENTITY SCOPE	Regeneron Pharmaceuticals, Inc. / regeneron.com. RGC-specific d workflow.	STRONGEST CONTRADICTION	OneTrust already spans at least two visible workflows and currently markets D strengthen the incumbent environment.
UNKNOWN	Internal OneTrust scope across PIA/ROPA/assessments/data map Transcend operating advantage.	BUYER / POSTURE	Primary: Privacy Office leadership. Secondary: Digital & IT, Data Governance, I

Lucid Software - account evidence

Final Priority B. A live OneTrust rights portal and Osano consent state create a split-stack question during active compliance expansion.

ID	TYPE	FACTUAL EXTRACTION / INTERPRETATION	SOURCE(S)	SOURCE DATE	CLASS	LIMITATION / CONTRARY
L-01	FACT	Lucid currently operates a Lucid-branded OneTrust Privacy Portal for privacy-rights requests.	S-L04	Live 3 Sep 2026	IE-4B	Vendor-hosted operational evidence; scope is rights-request portal, not CMP.
L-02	FACT	Lucid cookie-consent state is supplied by Osano.	S-L03	Policy baseline 7 Nov 2025	Account / primary	Do not call OneTrust Lucid's CMP.
L-03	FACT	Lucid updated AI/admin controls in Aug 2026, including controls around Lucid AI, MCP access and Process Capture.	S-L05, S-L06	5 Aug / 20 Aug 2026	T3 support	Current operational AI/privacy control changes.
L-04	FACT	A current Compliance Manager role owns data mapping, privacy assessments, vendor risk, data retention and AI controls.	S-L07, S-L09, S-L10	Current; exact publication date not established	T3 support	OneTrust/Osano appear only under Preferred Qualifications: JP-3 weak support, not current-use proof.
L-05	FACT	Transcend documents OneTrust migration, DSR automation and a unified Privacy Center spanning DSRs, preferences and consent.	S-T05-S-T07	Current	AV-2	Prospect-documented capability; no independent superiority benchmark.
L-06	FACT	OneTrust currently documents end-to-end DSR automation.	S-C07	Current	Contrary evidence	Substantial parity against generic DSR claims.
L-07	INTERPRETATION	The observed OneTrust + Osano split creates a consolidation question while Lucid expands privacy/AI compliance work.	L-01 to L-06	Checked 3 Sep 2026	Priority B	The split may be deliberate best-of-breed architecture; no dissatisfaction or switch intent established.

FINAL READ

Verify whether the OneTrust + Osano split is intentional and whether OneTrust handles only rights intake or deeper fulfillment. Do not infer that coexistence is fragmentation pain.

Lucid Software - scope, chronology and contradiction

The account depends on precise product scope: OneTrust is evidenced for the privacy-rights portal; Osano is evidenced for cookie-consent state.

DATE	OBSERVED EVENT	SOURCE	READ
7 Nov 2025 baseline	Lucid cookie policy shows Osano consent manager / Lucid consent pulled from Osano.	S-L03	Consent architecture
Current 3 Sep 2026	Lucid-branded OneTrust Privacy Portal is live.	S-L04	Current incumbent for rights-request portal
5 Aug 2026	Admin AI controls updated around Lucid AI and MCP access.	S-L05	Current structural change
20 Aug 2026	Process Capture documentation updated; screenshots/optional microphone audio and AI-provider processing.	S-L06	Current data-handling complexity
Current	Compliance Manager role covers data mapping, assessments, vendor risk, retention and AI controls.	S-L07	T3 support; vendor names are JP-3 only

ENTITY / SCOPE	Lucid Software Inc. / lucid.co. airfocus is scoped separately. OneTrust Privacy Portal.	STRONGEST CONTRADICTION	The observed split may be deliberate best-of-breed architecture. OneTrust has JP-3 Preferred Qualifications.
----------------	---	-------------------------	--

UNKNOWN	OneTrust fulfillment scope beyond intake; whether Osano is strat	BUYER / POSTURE	Primary: Legal / Privacy / Compliance. Secondary: IT & Security, Product/Engineering
---------	--	-----------------	--

Ocado Group - Watch audit

Not a finalist. CD-15 upgraded weak Optanon evidence to direct IE-4A proof, but the current opening did not survive.

ID	TYPE	FACTUAL EXTRACTION / INTERPRETATION	SOURCE(S)	SOURCE DATE	CLASS	LIMITATION / CONTRARY
O-01	FACT	Ocado Group and Ocado Careers directly state that OneTrust provides their cookie-control tool.	S-O03, S-O04	1 Feb 2025	IE-4A	Direct account-authored current vendor proof on two properties.
O-02	FACT	Ocado Intelligent Automation states that HubSpot provides its cookie-control tool.	S-O08	25 May 2023	Contrary evidence	Long-standing property-scoped multi-vendor architecture; not a fresh consolidation signal.
O-03	FACT	Ocado updated privacy documentation in May 2026 and maintains current AI-governance/EU AI Act activity.	S-O05-S-O07	May / 2026	T2	No public source ties these changes to OneTrust/CMP review or a new consent-platform requirement.
O-04	INTERPRETATION	Ocado remains Watch: incumbent proof is strong but no account-linked T3/T4 trigger or specific Transcend advantage survived.	O-01 to O-03	Checked 3 Sep 2026	Watch	Monitor posture; no CD-20 required after blind review found no stronger trigger or advantage.

WHY WATCH, NOT PRIORITY B

The numeric floor alone is not enough. Ocado has IE-4A + T2 + AV-2, but the current T2 activity is not materially linked to OneTrust review/replacement and the AV-2 relationship remains generic. The OneTrust/HubSpot split has existed at least since OIA's 25 May 2023 Cookie Policy, which weakens any fresh consolidation-pain story.

BLIND REVIEW RESULT

Independent review found no T3/T4 trigger tied to consent/privacy tooling and no Ocado-specific requirement where Transcend had a defensible advantage. Watch confirmed; no CD-20 required.

DHL Group - Reject audit

Rejected after deep research. Current incumbent proof survived; the displacement thesis did not.

ID	TYPE	FACTUAL EXTRACTION / INTERPRETATION	SOURCE(S)	SOURCE DATE	CLASS	LIMITATION / CONTRARY
D-01	FACT	DHL Group currently names OneTrust Cookie Consent Management on the observed group.dhl.com property.	S-D05	Current	IE-4A	Property-scoped incumbent proof.
D-02	FACT	The May 2026 DHL Express AI item-identification rollout is current but not publicly connected to OneTrust/CMP/privacy-governance change.	S-D06	7 May 2026	T2	Do not promote to T3 without an account-linked privacy/consent change.
D-03	FACT	DHL data-governance documentation already contemplated customer audio-visual data before the May 2026 product launch.	S-D09, S-D10	Nov/Dec 2025	Contrary evidence	Weakens a narrative that the photo flow itself created a new governance trigger.
D-04	INTERPRETATION	DHL was rejected because no account-specific Transcend advantage or near-term displacement opening survived negative-evidence review.	D-01 to D-03; S-C04-S-C06	Checked 3 Sep 2026	Reject	S-D08 LinkedIn detail remains pending manual screenshot verification and is not load-bearing.

WHY REJECT

The May 2026 AI rollout remained T2 because no public evidence linked it to consent/CMP/privacy-governance change. Transcend capability was documented, but no DHL-specific gap survived. OneTrust product overlap and chronology weakened the case.

SOURCE INSPECTION NOTE

S-D08 is retained for audit history but remains pending manual screenshot verification. It is explicitly non-load-bearing: DHL would still be rejected without it.

Prospect capability and incumbent counter-evidence

Capability claims are preserved with source ownership. Prospect marketing is not converted into independent proof.

OWNER	CAPABILITY	SOURCE	CLASS	USE / LIMITATION
Transcend	OneTrust switching / migration	S-P01, S-P02	AV-2	Direct prospect positioning; establishes migration capability/motion, not target-account intent.
Transcend	Consent/preference enforcement across downstream systems and AI/data workflows	S-T02, S-T03	AV-2	Prospect-documented capability; account-match must be separately proven.
Transcend	DSR automation + unified Privacy Center	S-T05, S-T06	AV-2	Relevant to Lucid; no independent superiority benchmark.
Transcend	Assessments + OneTrust-format import + live data inventory/ROPA	S-T08-S-T10	AV-2	Relevant to Regeneron; no independent superiority benchmark.
OneTrust	DSR Automation	S-C07	Contrary	Substantial parity against generic DSR claims.
OneTrust	Privacy Operations / RoPA / data mapping	S-C08	Contrary	Material parity for Regeneron modernization thesis.
OneTrust	AI Governance	S-C10, S-C04-S-C06	Contrary	Weakens any framing that OneTrust is static or limited to cookie banners.

NO SUPERIORITY CLAIM

The brief does not say Transcend is generally better than OneTrust. It says two accounts are worth targeted verification because current account changes intersect with prospect-documented capabilities while important parity/embedding evidence remains visible.

Entity, conflict and review controls

Conflict Check A passed for the prospect, competitor and researched target accounts. Check B remains a pre-delivery requirement.

ORG	ROLE	LEVEL	DECISION	REVIEWED	CONDITION
Transcend	ACTIVE PROSPECT (candidate)	CF-0	PROCEED	2026-09-03	Conflict Check A PASS (2026-09-03): File Library + Product #01 registry/history screen found no material overlapping commercial or adversarial relationship. Proceed; revalidate all public evidence independently and run Conflict Check B before delivery. Check B remains mandatory immediately before delivery.
OneTrust	SUBJECT - COMPETITOR	CF-0	PROCEED	2026-09-03	Conflict Check A PASS (2026-09-03): File Library + Product #01 registry/history screen found no material overlapping commercial or adversarial relationship. Public evidence only. Check B remains mandatory immediately before delivery.
Lucid Software	SUBJECT - TARGET ACCOUNT	CF-0	PROCEED	2026-09-03	Conflict Check A PASS (2026-09-03): File Library + Product #01 history screen found no material overlapping commercial or adversarial relationship. Public evidence only. Check B remains mandatory immediately before delivery.
DHL Group	SUBJECT - TARGET ACCOUNT	CF-0	PROCEED	2026-09-03	Conflict Check A PASS (2026-09-03): File Library + Product #01 registry/history screen found no material overlapping commercial or adversarial relationship. Public evidence only; run Check B before delivery. Check B remains mandatory immediately before delivery.
Regeneron	SUBJECT - TARGET ACCOUNT	CF-0	PROCEED	2026-09-03	Conflict Check A PASS (2026-09-03): no material overlapping Evidence Axis commercial/adversarial relationship found. Public evidence only. Check B remains mandatory immediately before delivery.
Ocado Group	SUBJECT - TARGET ACCOUNT	CF-0	PROCEED	2026-09-03	Conflict Check A PASS (2026-09-03): File Library + Product #01 registry/history screen found no material overlapping commercial or adversarial relationship. Public evidence only; run Check B before delivery. Check B remains mandatory immediately before delivery.

ACCOUNT	REVIEW / INSPECTION EFFECT
Lucid	Independent human reviewer re-opened direct sources, corrected the Greenhouse URL, calibrated vendor names in the job post as JP-3, and did not verify a OneTrust row in the cookie table. The narrow Priority-B thesis survived.
Regeneron	Independent human reviewer challenged R47119 recency, corrected R46433 title/scope, added R47426 as governance corroboration, and confirmed T3/Medium rather than T3/High.
Ocado	Independent human reviewer verified OneTrust on corporate/careers, HubSpot on OIA, and found no stronger T3/T4 trigger or account-specific advantage. Watch confirmed.
DHL	LinkedIn job detail could not be independently inspected through automated access; source is marked pending manual screenshot verification and is not load-bearing.

Full source register

All source records retained for this Gift research cycle, including duplicate/superseded audit entries and source-inspection notes.

HOW TO READ	Checked Date is when Evidence Axis reviewed the source. Source Date is the publication/update status actually relied on where visible. "Current / undated" is deliberate; no publication date was invented. SUPERSEDED rows are retained only for audit history.	
S-P01 Prospect / primary	Source date: Current page; publication date not relied on Checked: 2026-09-03	https://transcend.io/switch-to-transcend Use: Prospect positioning and OneTrust switching motion
S-P02 Prospect / primary	Source date: Current guide; publication date not relied on Checked: 2026-09-03	https://transcend.io/resources/the-definitive-guide-for-switching-off-onetrust Use: Direct OneTrust migration positioning
S-C01 Competitor / primary	Source date: Current discovery page Checked: 2026-09-03	https://www.onetrust.com/customers/ Use: Candidate discovery only until account-authorized verification
S-C02 Competitor / primary	Source date: Current product page Checked: 2026-09-03	https://www.onetrust.com/products/ Use: Named customer logos and OneTrust product context
S-C03 Competitor / primary	Source date: Undated current page; historical implementation content Checked: 2026-09-03	https://www.onetrust.com/customers/dhl/ Use: DHL discovery / competitor relationship claim
S-T01 Prospect / primary	Source date: Current page; publication date not relied on Checked: 2026-09-03	https://transcend.io/switch-to-transcend Use: Explicit OneTrust displacement motion; AV-2 only
S-T02 Prospect / primary	Source date: Current page; publication date not relied on Checked: 2026-09-03	https://transcend.io/platform Use: Permissioning, consent propagation, AI/data-use claims; AV-2 only
S-L01 SUPERSEDED / DO NOT USE	Source date: SUPERSEDED Checked: 2026-09-03	https://lucid.co/cookies Use: SUPERSEDED BY S-L03 for cookie-policy extraction. Do not use S-L01 as OneTrust current-use evidence; S-L04 is the live OneTrust Privacy Portal.
S-L02 SUPERSEDED / DO NOT USE	Source date: SUPERSEDED Checked: 2026-09-03	https://help.lucid.co/hc/en-us/articles/51996666057492-Lucid-admin-panel-AI-controls Use: SUPERSEDED BY S-L05; exact duplicate URL; retained for audit history only.

QA note: SUPERSEDED BY S-R11. Prior R46433 title/slug was misattributed. Do not cite or use this row as evidence. Canonical Evidence Axis reference is S-R11.
S-O01 SUPERSEDED FOR ATTRIBUTION / CONTEXT ONLY	Source date: Cookie list updated Feb 2026 Checked: 2026-09-03	https://www.ocadogroup.com/about-us/cookie-list Use: Optanon cookie-list corroboration only. QA note: SUPERSEDED BY S-O03 for OneTrust attribution; old 'vendor attribution still to verify' note is stale.
S-O02 Account / primary	Source date: Current careers context Checked: 2026-09-03	https://careers.ocadogroup.com/ Use: Current AI/robotics/software scale context
S-D04 Competitor / primary	Source date: Undated current page; historical implementation content Checked: 2026-09-03	https://www.onetrust.com/customers/dhl/ Use: DHL A/B-testing case study; historical/undated on current page; contrary evidence only
S-D05 Account / primary	Source date: Current when checked 3 Sep 2026 Checked: 2026-09-03	https://group.dhl.com/en/data-protection.html Use: Current OneTrust CMP use + current consent/data-sharing requirements
S-D06 Account / primary	Source date: 7 May 2026 Checked: 2026-09-03	https://group.dhl.com/en/media-relations/press-releases/2026/dhl-express-introduces-ai-powered-item-identification-for-international-shipping.html Use: May 2026 AI product launch; current change, but privacy-governance link unproven
S-D07 Account / primary - context only	Source date: 1 Sep 2026 Checked: 2026-09-03	https://group.dhl.com/en/media-relations/press-releases/2026/dhl-group-completes-corporate-reorganization.html Use: Entity/chronology context only; not cited in D-01-D-04 and not load-bearing for the DHL Reject decision.
S-T03 Prospect / primary	Source date: Current page; publication date not relied on Checked: 2026-09-03	https://transcend.io/platform/consent-preference-management Use: Real-time downstream consent/preference enforcement claim; AV-2 only
S-T04 Prospect / primary	Source date: Current page; publication date not relied on Checked: 2026-09-03	https://transcend.io/switch-to-transcend Use: Direct OneTrust migration positioning/tooling; AV-2 only

S-D08 Employee-linked public evidence / LinkedIn	Source date: Recent-historical; manual date verification pending Checked: 2026-09-03	https://cz.linkedin.com/jobs/view/cookies-compliance-consent-specialist-onetrust-at-dhl-it-services-4147744848 Use: Recent-historical DHL IT Services role operating OneTrust portal; banner configuration, consent logs, analytics, ongoing maintenance. Negative evidence / embedding. QA note: LinkedIn posting — pending manual screenshot verification per Blueprint §6.8. Automated access is restricted; exact title, visible publication date, relevant body text and a screenshot must be manually captured before this source is reused as load-bearing client evidence. DHL's CD-19 rejection does not depend on this source: the T2 trigger and unresolved account-specific advantage are independently sufficient to keep DHL out of the Gift.
S-D09 Account / primary	Source date: Policy V3.0 Nov 2025; reviewed 2026 Checked: 2026-09-03	https://group.dhl.com/en/data-protection.html Use: DHL Group Data Privacy Policy: Data Protection Officials, Privacy Portal, PIAs; V3.0 Nov 2025, authority review confirmed 2026.
S-D10 Account / primary PDF	Source date: Dec 2025 data-flow report Checked: 2026-09-03	https://group.dhl.com/content/dam/deutschepostdhl/en/media-center/responsibility/dhl-group-data-privacy-policy-appendix-2-processing-activities-and-data-flows-report.pdf Use: Dec 2025 data-flow report already lists customer audio-visual data under service delivery/product development and governance categories; weakens claim that photo flow alone creates a new governance trigger.
S-C04 Competitor / primary	Source date: Winter 2026 release page Checked: 2026-09-03	https://www.onetrust.com/blog/evolving-privacy-programs-with-ai-whats-new-in-the-onetrust-winter-26-release/ Use: OneTrust Winter '26: consent integrated with AI/data governance; current competitive overlap.
S-C05 Competitor / primary	Source date: Current page; publication date not relied on Checked: 2026-09-03	https://www.onetrust.com/solutions/data-use-governance/ Use: OneTrust real-time data-use governance / policy enforcement for AI-ready data; competitive overlap.
S-C06 Competitor / primary	Source date: Apr 2026 Checked: 2026-09-03	https://www.onetrust.com/news/onetrust-introduces-a-new-approach-to-consent-aware-data-clean-rooms/ Use: Apr 2026 consent enforcement downstream in Snowflake data workflows; competitive overlap.
S-L03 Account / primary	Source date: Policy baseline 7 Nov 2025 Checked: 2026-09-03	https://lucid.co/cookies Use: Current cookie policy: lucid-cookie-consent is pulled from Osano; osano_consentmanager records consent categorization. QA note: Blind reviewer independently rechecked the full cookie table twice and did not verify a OneTrust row there. Current OneTrust use therefore relies on the separately live Lucid Privacy Portal (S-L04), not this cookie-policy source.
S-L04 Operational vendor-hosted / direct observation	Source date: Live when checked 3 Sep 2026 Checked: 2026-09-03	https://lucid-privacy.my.onetrust.com/webform/dd23153e-c583-47e6-9054-4ed77b637cb4/2f144bec-ae0c-4ce9-b9b8-f216891f1988 Use: Live Lucid-branded OneTrust Privacy Portal. Supports current OneTrust use for privacy-rights intake/portal; not CMP.
S-L05 Account / primary	Source date: Updated 5 Aug 2026 Checked: 2026-09-03	https://help.lucid.co/hc/en-us/articles/51996666057492-Lucid-admin-panel-AI-controls Use: AI controls updated 5 Aug 2026; admin control over Lucid AI, Process Capture and MCP access.
S-L06 Account / primary	Source date: Updated 20 Aug 2026 Checked: 2026-09-03	https://help.lucid.co/hc/en-us/articles/49874443096980-Use-Process-Capture-to-turn-screen-recordings-into-diagrams-with-Lucid-AI Use: Process Capture updated 20 Aug 2026; screenshots/optional microphone audio, AI-provider processing, context-panel storage.
S-L07 Account job board / primary — JP-3	Source date: Current posting; exact publication date not established Checked: 2026-09-03	https://job-boards.greenhouse.io/lucidsoftware/jobs/6111613004 Use: Compliance Manager. Responsibilities include core SaaS compliance programs: data mapping, privacy assessments, data retention, vendor risk and AI controls. Preferred Qualifications mention direct experience managing OneTrust and Osano and building privacy workflows such as DSR intake. JP-3: supportive only; do not infer current platform use from the preferred qualification. QA note: Manual human blind-review verification on 2026-09-03: exact Greenhouse URL, title 'Compliance Manager', and page status 'New' were inspected. Automated retrieval may redirect. Role content is corroborated by current public job mirrors. No publication date is inferred from 'New'.

S-L08 Account / primary	Source date: Current trust-center status Checked: 2026-09-03	https://trust.lucid.co/ Use: Mature privacy/security program; current certifications include ISO 27701 and ISO 42001; useful negative/context evidence.
S-T05 Prospect / primary	Source date: Current docs; publication date not relied on Checked: 2026-09-03	https://docs.transcend.io/docs/articles/dsr-automation Use: End-to-end DSR automation across connected systems; identity verification, enrichment, automated processing and secure report delivery. AV-2 only.
S-T06 Prospect / primary	Source date: Current docs; publication date not relied on Checked: 2026-09-03	https://docs.transcend.io/docs/articles/privacy-center Use: Unified Privacy Center for DSRs, preferences, consent and policies. AV-2 only.
S-T07 Prospect / primary	Source date: Current page; publication date not relied on Checked: 2026-09-03	https://transcend.io/switch-to-transcend Use: Direct OneTrust migration positioning and consolidation of consent, preferences, DSR and data discovery. AV-2 only.
S-C07 Competitor / primary	Source date: Current page; publication date not relied on Checked: 2026-09-03	https://www.onetrust.com/products/data-subject-request-dsr-automation/ Use: OneTrust DSR Automation: intake, identity verification, discovery/deletion, redaction and secure response. Strong parity/contradiction evidence.
S-L09 Independent job mirror / corroboration	Source date: Current mirror; date not used Checked: 2026-09-03	https://builtin.com/job/compliance-manager/10179279 Use: Corroborates Compliance Manager role content: Preferred Qualifications include OneTrust and Osano experience and privacy workflows such as data mapping / DSR intake. QA note: Corroboration only. Primary role classification remains JP-3 because the vendor names appear under Preferred Qualifications.
S-L10 Account job board / indexed duplicate reference	Source date: Indexed duplicate; date not used Checked: 2026-09-03	https://job-boards.greenhouse.io/lucidsoftware/jobs/6115461004 Use: Human blind reviewer found an indexed duplicate of the same Lucid Compliance Manager posting/content under this Greenhouse ID. QA note: Secondary reference only. Primary inspected posting remains S-L07 / job 6111613004.
S-R04 Account / primary	Source date: Privacy Notice updated 20 Nov 2025 Checked: 2026-09-03	https://www.regeneron.com/privacy-notice Use: Corporate Privacy Notice last updated Nov 20 2025; rights requests are submitted through a privacyportal.onetrust.com webform. IE-4A for DSR intake scope.
S-R05 Operational vendor-hosted / directly linked by account	Source date: Live when checked 3 Sep 2026 Checked: 2026-09-03	https://privacyportal.onetrust.com/webform/df5f6708-6e7d-4110-a239-60f9733416f1/5c85ee99-0186-48a8-9e56-68fbb12f2c99 Use: OneTrust Privacy Portal webform reached directly from Regeneron's first-party Privacy Notice.
S-R06 Account / primary PDF	Source date: Cookie Policy updated Mar 2026 Checked: 2026-09-03	https://www.regeneron.com/downloads/cookie-policy.pdf Use: Regeneron.com Cookie Policy last updated March 2026; OptanonConsent and OptanonAlertBoxClosed explicitly described as OneTrust cookie-compliance solution.
S-R07 Account / primary job posting	Source date: Current role; first creation date not established Checked: 2026-09-03	https://careers.regeneron.com/en/jobs/r47119/senior-manager-legal-data-privacy-operations/ Use: Current Senior Manager Legal Data Privacy Operations: improve PIA, ROPA and DSAR processes; use technology and AI to automate privacy operations; manage vendor relationships.
S-R08 SUPERSEDED / DO NOT USE	Source date: SUPERSEDED Checked: 2026-09-03	https://careers.regeneron.com/en/jobs/r46433/senior-director-assistant-general-counsel-privacy/ Use: Duplicate prior R46433 reference with incorrect role title/slug; retained only for audit history. QA note: SUPERSEDED BY S-R11. Prior R46433 title/slug was misattributed. Do not cite or use this row as evidence. Canonical Evidence Axis reference is S-R11.

S-R09 Account / primary	Source date: 2 Apr 2026 Checked: 2026-09-03	https://investor.regeneron.com/news-releases/news-release-details/regeneron-collaborates-trinetx-access-de-identified-electronic Use: Apr 2 2026 TriNetX collaboration: access to de-identified health data from ~300M individuals, expansion of EHR-linked database and AI training; RGC/entity-scoped context.
S-R10 Account / primary job posting	Source date: Current posting Checked: 2026-09-03	https://careers.regeneron.com/en/jobs/r47043/director-data-governance-and-contract-compliance-regeneron-genetics-center-rgc/ Use: Current RGC data-governance role covers ~150 global data licensing collaborations, consent frameworks, cross-border data, privacy-preserving technologies; RGC-scoped.
S-R11 Account / primary job posting	Source date: Current posting Checked: 2026-09-03	https://careers.regeneron.com/en/jobs/r46433/director-corporate-counsel-privacy-counsel-digital-cyber-ai/ Use: Current Director, Privacy Counsel: Digital, Cyber AI. Supports Digital and Information Technology functions including Information Security, AI and Data Governance; assesses privacy risks for innovative initiatives, advises on privacy/AI adoption and AI use-case assessments, and participates in technology-related committees/workgroups. QA note: CANONICAL R46433 REFERENCE. Use this requisition ID + Regeneron Careers title in Evidence Axis outputs. Some mirrored/Workday surfaces may render a different title; S-R03 and S-R08 are superseded.
S-T08 Prospect / primary	Source date: Current page; publication date not relied on Checked: 2026-09-03	https://transcend.io/platform/assessments Use: Transcend Assessments: AI-enabled assessments, data-inventory sync, automation, and import of existing OneTrust assessment library. AV-2 only.
S-T09 Prospect / primary	Source date: Current docs; publication date not relied on Checked: 2026-09-03	https://docs.transcend.io/docs/articles/assessments/quickstart Use: Transcend supports import of OneTrust-formatted assessment templates. AV-2 migration/reuse capability.
S-T10 Prospect / primary	Source date: Current page; publication date not relied on Checked: 2026-09-03	https://transcend.io/platform/data-inventory Use: Live Data Inventory / ROPA tied to DSR and AI-governance workflows. AV-2 only.
S-C08 Competitor / primary	Source date: Current page; publication date not relied on Checked: 2026-09-03	https://www.onetrust.com/products/privacy-operations/ Use: OneTrust Privacy Operations: asset detection, personal-data discovery, activity mapping, RoPA and privacy-risk workflows. Strong parity evidence.
S-C09 Competitor / primary	Source date: Current page; publication date not relied on Checked: 2026-09-03	https://www.onetrust.com/products/data-subject-request-dsr-automation/ Use: OneTrust DSR Automation: intake, ID verification, discovery/deletion, redaction and secure response. Strong parity evidence. QA: Same URL as S-C07; retained for Regeneron claim mapping, not a separate source.
S-C10 Competitor / primary	Source date: Current page; publication date not relied on Checked: 2026-09-03	https://www.onetrust.com/solutions/ai-governance/ Use: OneTrust AI Governance: AI inventory, risk assessment, policy enforcement, monitoring and runtime controls. Strong parity evidence.
S-R12 Independent dated job mirror	Source date: Posted 16 Aug 2026 Checked: 2026-09-03	https://www.legal.io/jobs/5853823/Full-time/Senior-Manager-Legal-Data-Privacy-Operations Use: Same R47119 role; Legal.io shows Posted Aug 16, 2026. Establishes current/recent recruiting activity, not the role's first creation date. QA note: Use for recency only. Blind reviewer observed old og:published/modified metadata on Regeneron's page, so do not describe R47119 as a newly created 2026 role.
S-R13 Independent dated job mirror	Source date: Posted 28 Aug 2026 Checked: 2026-09-03	https://www.goinhouse.com/jobs/585064299-senior-manager-legal-data-privacy-operations-at-regeneron-pharmaceuticals-inc Use: Same R47119 role; GoInhouse shows Posted Aug 28, 2026 and the R47119 reference. Corroborates active Aug 2026 reposting. QA note: Reposting/evergreen possibility remains.
S-R14 Independent job mirror	Source date: Current repost Checked: 2026-09-03	https://builtin.com/job/senior-manager-legal-data-privacy-operations/9198768 Use: Same R47119 role; Built In labels it 'Reposted'. Supports current active hiring while reinforcing evergreen/repost caution. QA note: Do not infer role novelty.

S-R15 Independent dated job mirror	Source date: Posted 21 Aug 2026 Checked: 2026-09-03	https://www.legal.io/jobs/5855996/Full-time/Senior-Director-Assistant-General-Counsel-Privacy/Sleepy-Hollow/New-York Use: R46433 — Director, Privacy Counsel: Digital, Cyber AI. Legal.io shows Posted Aug 21, 2026. Role supports Digital/IT, Information Security, AI and Data Governance and assesses privacy risks around innovative initiatives. QA note: Dated recency corroboration. Canonical title/reference is S-R11; mirror titles may render differently.
S-R16 Account / primary filing	Source date: 2026 proxy; committee established Apr 2026 Checked: 2026-09-03	https://investor.regeneron.com/pdf/2026Proxy Use: 2026 Proxy: Digital Technology Committee established in April 2026; oversees AI/digital technology, digital transformation, data governance and privacy-law compliance. QA note: Primary structural-change evidence for T3; distinct from the older Technology Committee.
S-R17 Account / primary Workday posting	Source date: Current posting Checked: 2026-09-03	https://regeneron.wd1.myworkdayjobs.com/nl-NL/Careers/job/Senior-Director--Global-Data-Protection---AI-Security_R47426 Use: Senior Director, Global Data Protection & AI Security (R47426). Regeneron says it is building a dedicated Data Protection function; the role advises the Enterprise Data & AI governance council and owns DSPM strategy across a 112+ PB data estate. QA note: Corroborating structural evidence only. This is a data-protection/security role, not direct evidence of OneTrust replacement or Privacy Office platform migration.
S-O03 Account / primary	Source date: Effective 1 Feb 2025 Checked: 2026-09-03	https://www.ocadogroup.com/about-us/cookie-settings Use: Ocado Group corporate Cookie Policy, Effective 01/02/2025: 'Our cookie control tool is provided by OneTrust.' Direct IE-4A incumbent evidence.
S-O04 Account / primary	Source date: Effective 1 Feb 2025 Checked: 2026-09-03	https://careers.ocadogroup.com/cookie-policy Use: Ocado Group Careers Cookie Policy, Effective 01/02/2025: OneTrust provides the careers-site cookie control tool. Second-property incumbent corroboration.
S-O05 Account / primary	Source date: Updated May 2026 Checked: 2026-09-03	https://www.ocadogroup.com/about-us/privacy-policy Use: Corporate Privacy Notice last updated May 2026; multiple global entities, technical/usage data, pseudonymised customer data for OSP/OIA R&D, and cookie-consent basis. QA note: Current privacy-program activity; do not infer OneTrust review from policy update alone.
S-O06 Account / primary	Source date: Effective May 2026 Checked: 2026-09-03	https://careers.ocadogroup.com/recruitment-privacy-notice Use: Recruitment Privacy Notice effective May 2026 across multiple regions. QA note: T2 context only unless tied to a platform/process change.
S-O07 Annual report mirror / public filing content	Source date: 2026 annual-report baseline Checked: 2026-09-03	https://financialfilings.com/filings/ocado-group-plc/annual-report/2026/32904298/ Use: Current annual-report discussion of AI Strategy & Governance Group, central AI use registry, EU AI Act review and responsible-AI training. QA note: Governance has historical continuity; use as context, not as a fresh procurement signal.
S-O08 Related Ocado property / primary	Source date: Effective 25 May 2023 Checked: 2026-09-03	https://ocadointelligentautomation.com/cookies Use: Ocado Intelligent Automation Cookie Policy states its cookie control tool is provided by HubSpot. QA note: Strong scope/contradiction evidence: OneTrust is not group-wide.
S-O09 Related Ocado property / primary	Source date: Updated Aug 2026 Checked: 2026-09-03	https://ocadointelligentautomation.com/privacy Use: OIA Privacy Policy currently shows an Aug 2026 update on the live page. QA note: Current privacy-policy activity; no evidence of OneTrust migration.

Unknowns, guardrails and appendix lock

What public evidence does not establish is as important as what it does establish.

ACCOUNT	PUBLIC-EVIDENCE UNKNOWN
Regeneron	Internal OneTrust breadth; whether modernization is inside OneTrust; contract scope; migration appetite; measurable Transcend advantage.
Lucid	Whether OneTrust handles deeper fulfillment; whether Osano is strategic; consolidation appetite; migration burden; measurable benefit.
Ocado	OneTrust scope beyond CMP; whether property-level multi-vendor design is strategic; any consent-platform review; any Ocado-specific Transcend gap.
DHL	Any direct replacement/migration signal; any DHL-authored OneTrust gap; inaccessible LinkedIn job evidence remains non-load-bearing.

LOCKED CLIENT-FACING
GUARDRAILS

Do not claim: that either finalist is dissatisfied, evaluating alternatives, planning migration, or ready to buy; that OneTrust is Lucid's CMP; that Regeneron is replacing OneTrust; that Ocado's property-level tooling is a fresh fragmentation pain signal; or that DHL's AI rollout created a consent-platform trigger. Evidence Decay: finalist hiring and operational signals are RAPID and must be rechecked before delivery/outreach. Conflict: Check B remains mandatory immediately before delivery. QA: formal CD-24 adversarial content QA and CD-25 visual/PDF QA apply to the combined Brief + Appendix package.

CD-23 STATUS

Evidence Appendix built from the audited Research OS and the final CD-21 dossiers. This document is not FINAL SEND until CD-24, CD-25 and CD-26 pass.
