

Evidence Appendix

Aisel Health - UK Entry Competitive Brief

Prepared by Evidence Axis | Checked 27 August 2026

Scope: This appendix supports the Executive Intelligence Deck. It uses public evidence only. It does not assess Aisel internal compliance status, registry applications in progress, sales pipeline, customer contracts, or legal/regulatory advice.

1. Finding Register

ID	Classification	Finding / boundary
F1	INFERENCE	Aisel's UK institutional motion may face a route-to-market proof question before a feature question. Aisel publicly targets institutional buyers and includes an AI scribe; the NHS AVT registry lists 27 suppliers that submitted evidence, while Aisel is not visible under reviewed public names.
F2	INFERENCE	Aisel's UK threat set includes an adjacent mental-health workflow platform route: Limbic has NHS mental-health visibility and added TORTUS-powered ambient scribing to Limbic Care in June 2026.
F3	INFERENCE	Aisel's strongest public wedge is not simply faster notes. The better defended frame appears to be psychiatric memory plus source-linked, high-stakes documentation.
G1	GUARDRAIL	F1 does not claim Aisel lacks DTAC, DCB0129, MHRA registration, medical-device status, or a registry application. Public status is Unknown unless explicitly documented.
G2	GUARDRAIL	Heidi is used as a UK assurance benchmark, not as a direct psychiatry competitor. JotPsych is used as global category context; UK presence was not established.

2. Evidence Chain - F1: UK registry / procurement route signal

Step	Evidence	Source IDs	Status
Aisel product scope	Aisel product page states it handles intake before the visit, notes during it, heavy documents after, and includes Aisel Scribe for in-person and video consultations, EHR sync, and clinician review/sign-off.	A1	FACT
Institutional positioning	Aisel institutional page targets hospitals and institutional buyers, including NHS and EU healthcare systems. It shows Built for procurement, SSO, audit logs, data-residency controls, dedicated onboarding, SLA, procurement support, UK/EU hosting, EHR/EPR integration.	A2	FACT
Registry existence	NHS Digital describes the AVT self-	N1	FACT

	certified supplier registry as a national capability to support safe and effective scaling and adoption of AVT. It lists 27 suppliers as of last edit 21 Aug 2026.		
Registry requirements	Find a Tender states suppliers must hold Class 1 Medical Device accreditation and current DTAC assessment, and submit evidence such as NHS benefit, integration capability, pricing, demo video, performance monitoring, and MHRA Class 1 registration evidence.	N3	FACT
Aisel registry visibility	Aisel / Aisel Health / Aisel Health ApS were not visible in the reviewed public registry list.	N1	FACT about reviewed list; UNKNOWN about internal application/status
Decision exposure	If NHS/institutional entry is near-term, registry readiness and public assurance proof may be a commercial sequencing issue, not a website wording issue.	A1, A2, N1, N3	INFERENCE

3. Evidence Chain - F2: mental-health workflow distribution moving into documentation

Step	Evidence	Source IDs	Status
Limbic in NHS mental health	Oxford Health NHS describes Limbic as an AI-powered chatbot supporting NHS Talking Therapies access in Oxfordshire and Buckinghamshire. A UK Parliament answer says NHS Talking Therapies offers tools such as Limbic Access and Wysa for self-referral, pre-assessment data collection, and therapist support.	L2, L3	FACT
Limbic scale claim	Limbic states that 45% of NHS Talking Therapies trust Limbic and that it has delivered clinical assessments for over 650,000 patients. This is first-party and should not be treated as independent audited evidence.	L4	VENDOR CLAIM
Move into scribing	Limbic announced on 4 Jun 2026 that Limbic Care embeds a TORTUS-powered medical AI scribe with ambient listening, real-time capture, auto-formatting templates, clinical letters, and standardized notes.	L1	FACT/VENDOR PRODUCT CLAIM
Registry bridge	TORTUS is listed on the NHS AVT supplier registry.	N1	FACT
Decision exposure	The UK competitive threat may be an existing mental-health workflow platform attaching registered AVT capability, rather than a standalone psychiatry scribe competing feature-for-feature.	L1, L2, L3, N1	INFERENCE

4. Evidence Chain - F3: Aisel's differentiated wedge

Aisel public capability	Evidence	Source IDs	Classification
Intake and longitudinal context	Aisel says it handles AI intake and	A1	FACT

	surveys before the visit and stores structured context in the record.		
Psychiatry scribe	Aisel shows a scribe for in-person/video consultations, prior-note context, psychiatry-specific note templates, review/sign-off, and EHR sync.	A1	FACT
Heavy documents	Aisel states its document generator supports court, tribunal, MHA, medico-legal, benefits documents, source citations, contradiction detection, and completeness checks.	A1, A3	FACT
Recommended frame	The defensible public narrative appears stronger around psychiatric memory and defensible documentation than around generic ambient scribing.	A1, A3, H2, L1	INFERENCE

5. Competitor / benchmark role discipline

Name	Role in this brief	Why included	Boundary
Heidi	UK assurance benchmark	Heidi is on the NHS AVT registry and publicly surfaces UK compliance signals including DCB0129, DTAC, DSPT, Cyber Essentials, and UK hosting. It also has mental-health pages.	Not presented as a direct psychiatry OS competitor.
Limbic + TORTUS	Adjacent UK mental-health workflow threat	Limbic has public NHS mental-health workflow visibility. It added TORTUS-powered scribing, and TORTUS appears on the registry.	Not identical to Aisel; the threat is route/distribution plus documentation, not feature parity.
JotPsych	Global category drift context	JotPsych's current product is broader than a simple scribe: EHR replacement language, prescribing, scheduling, telehealth, billing, RCM, credentialing, messaging.	UK presence not established. Do not frame as UK competitor.

6. Unknowns and not-established claims

Item	Status	Why it matters
Aisel DTAC / DCB0129 / MHRA status	UNKNOWN	No reviewed public evidence establishes status. Do not imply absence.
Aisel AVT registry application in progress	UNKNOWN	No public evidence reviewed. Could be in progress or under another legal/trade name.
Aisel NHS customer or pilot status	UNKNOWN	Public evidence reviewed supports UK entry ambition and UK/EU data residency, not confirmed NHS adoption.
JotPsych UK presence	NOT ESTABLISHED	Public country evidence reviewed points elsewhere. Do not use it as a UK threat.
Limbic/TORTUS product parity with Aisel	NOT ESTABLISHED	The point is workflow/distribution movement, not identical capability.

7. Source Register

ID	Source	Class	URL	Review	Use
A1	Aisel product page	Company first-party	https://www.aisel.co/	27 Aug 2026	Product scope: intake,

			product		scribe, documents, EHR sync.

8. Final guardrails

- Allowed: say the reviewed NHS registry page lists 27 suppliers and Aisel was not visible under the reviewed public names.
- Not allowed: say Aisel is non-compliant, unregistered internally, or unable to sell to the NHS.
- Allowed: say Limbic/TORTUS is an adjacent UK mental-health workflow threat because of NHS mental-health visibility plus new documentation functionality.
- Not allowed: say Limbic/TORTUS has feature parity with Aisel or directly replaces Aisel for psychiatry OS use cases.
- Allowed: use Heidi as a UK compliance/proof benchmark.

- Not allowed: present Heidi as a direct psychiatry-specific competitor unless further evidence supports it.
- Allowed: use JotPsych as global category drift context.
- Not allowed: present JotPsych as a UK competitor; UK presence was not established.
